**«My safety and me»**

Our life is comfortable nowadays but at the same time it's so dangerous. We can be involved into different unusual or untypical situations. To choose the right way of behavior one should be informed. They say "Forewarned is forearmed". Our students have prepared some occasions where they would like to present the kinds of solving.

**The 1<sup>st</sup> group are introducing us the situation with the strange object.**

- Oh, what is it? May be somebody has lost it? Let's look.
- Stop! Don't touch it! Look! This bag is black, it's in the crowded place, there isn't anybody nearby. Let's listen!
- You are right! What should we do?
  - Do not touch , do not fit , do not move the suspicious object detected !
  - Immediately report the discovery of a suspicious object in the law enforcement agencies by phone: 01 or 02; the chief of the guard or the shift supervisor.
  - Fix the time and place of discovery.
  - Release from the people the danger zone within a radius of at least 100 meters.
  - Where possible, ensure the protection of a suspicious object and the danger zone.
  - It is necessary to ensure (to help ensure) organized the evacuation of people from the area adjacent to the danger zone.
  - Wait for the arrival of law enforcement officers, the suspicious object location, time and circumstances of its discovery.
- Next to act at the direction.
- And when we are in the city transport
- Buses, trolley buses, taxis transported daily by thousands of people. In the crush during rush hour or late at night it is not always easy to spot someone left luggage. But if you still come across a suspicious object view (often it is left so that it just is not conspicuous under the seat, between the seats at the end of the salon) , you should not touch it and try to understand what's inside . So you can activate the detonation of an explosive device.
- One should not use electronic devices next to the finding, it is not safe.
- The first thing to report about the discovery of the driver of the vehicle, which has clear instructions for action in a given situation.
- If possible, clean the area around the subject of an orphan from the people, but if this is not possible, then at least do not touch it.
- Take a picture of the object on your phone, note its location and the time of detection of the object, try to remember who could leave this thing and get off at the bus stop. All these details may be important to establish the identity of the owner abandoned the subject.
- Often explosives left in places not specially protected, such as parks, streets, entrances and staircases of houses, parked cars off the road and in parking lots.
- In this case, a detection extremely difficult. If you have found yourself in the entrance of things obscure accessories, try to find out - whether they do not belong to some of the residents. It is not necessary to move the object and look inside. Call emergency services and quietly enter the dispatcher object detection, describe it and call your name.
- As for the parks and streets , the bags, suitcases and other property owned by no one may be left on inadvertently owner - watch to see if the owner would return for it . If the object is intuitively resembles a bomb, in this case, better to be safe and to communicate on the phone about a foreign object. In the parks there are special police units that monitor the safety, often in places where people can see police patrols and to contact them. Always have on hand emergency phone numbers.

- Should pay their attention to the fact that touch other people's abandoned bags, fold, etc. is strictly prohibited. Explain why, and tell us who to tell if the baby noticed a suspicious object. In mobile phones, children should also keep emergency number service

### **The 2nd group has prepared something interesting.**

Global security has a General and comprehensive character. General nature is a joint effort and agreement of all the members of the world community to participate in ensuring global security. The concept of "comprehensive security" means accounting for all crisis situations in the development of the world community and decision making for strengthening and stabilizing the systems that support life of modern civilization.

- The world has light and dark sides. We've prepared jigsaw puzzles where some terms are encrypted. So, start. I'm light side.
- And I'm black.

Dark:

- 1.If somebody ordered:"You must give me some money, otherwise you'll have many troubles". (Blackmail)
2. If somebody does you harm. (Robbery)
3. When you hear rude words in your direction. (Treat)
4. If somebody tells something wrong. (Lie)
5. If somebody took something from your bag, home, car. (Stealing).

Light:

1. When all people the rich and the poor have the same possibilities. (Equality).
2. When you respect the opinion of a person, in spite his race or religion. (Tolerance).
3. When you can do or say what you want. (Freedom).
4. When you can get free education, medical care or authorities protection. (Right).
5. When you take care about poor people or homeless. (Kindness).

Not to get into difficult, dangerous and unexpected situation, be vigilant, cautious. be healthy and happy.

### **The group # 3 presents us how to be safety using a mobile phone.**

-Threats over the phone - it is expressed in the form of verbal statements about the possible application in relation to the illegal actions of a subscriber of the material or physical. Threats by telephone may be an isolated incident or become a systematic violation of peace in no way guilty people. What to do if you are threatened phone?

If somebody calls you and says that your family or relatives are in danger.

- Listen to me, your son is in our hands. You hadn't to call the police and tell anybody. You must bring two million dollars in... if somebody knows about it, your son will...
- Stop! What should we do in such situation?
  - In the case of an anonymous call threatening the use to you any unlawful influence measures :
  - 1. Try not to say anything, and in any case do not answer incriminating questions about your first or last name, place of residence, reliable news of relatives or acquaintances.
  - 2. Listen carefully caller. Try to remember the tone of voice and any distinguishing features (such as the presence of an accent, burr) .
  - Do not be afraid to ask questions -threatening. Ask him the name of the profession is doing. Try to figure out the base of the threats.
  - 4. As far as possible and in the case of repeated calls, set recording device and caller ID.
  - Remember the kind of calling: urban or mobile.
  - Fix the time of calling.

- Remember the noise during the calling: car's noise, train's noise, and the sounds of TV or radio, voices.
- Try to remember the people who are around you. May be you have quarreled with someone recently or you've got some enemies.

Trust completely to the police. They are professionals and they know what to do.

Everything will be OK!

The leaflet

If you want to be in safety you should

- ✓ Be attentive
- ✓ Be informed about dangerous situations
- ✓ Be watchful
- ✓ Be concentrated
- ✓ Don't be nervous
- ✓ Don't panic
